THE BEST ON EARTH

Illinois Man Who Took the Trophy In 1910 From All Competitors In Great International Contest At Columbus, O Pictures of the Corn.

R. A. James of Charleston, Ill., has the proud distinction of having grown the best ear of corn in all the 3,125,713,600 bushels of last year's bumper crop. At the National Corn Show recently held at Columbus, Ohio, this gentleman was awarded the W. K. Kellogg National Corn Trophy, donated in 1909 by W. K. Kellogg, president of the Kellogg Toasted Corn Flake Co., of Batt' Creek, Mich.

Thousands of ears of corn from all parts of the country and of all varieties were entered in the competition. The selection of the grand champion Sweepstakes and the award of the Kellogg trophy were made on general points of superiority.

The ear of corn grown by Mr. James is of Reid's Yellow Dent variety. It is 10 inches long, 7 1/2 inches in circumference, and has 20 rows of kernels, 6 to the inch in the row, average 5-8 of an inch in depth, and 5-16 of an inch in width. It is indeed a very correct type of yellow dent corn.

Mr. James, the winner is a vigorous farmer about 40 years of age and of pleasing personality, a man who has given careful study to corn culture, and who has achieved his success as a grand champion winner only by years of hard work and painstaking seed selection and careful breeding from season to season.

Illinois growers are especially elated over the result for the reason that this is the first time in four years that the honors have been wrested from the state of Indiana. Last year's champion ear, the first winter of the Kellogg trophy, was grown by Mr. Fred C. Palin, of Newtown, Ind. It was also of Reid's Yellow Dent variety, crossed with Alexander Gold Standard. Last year's prize winner is the more perfectly formed ear of the two, though it requires a careful judge to distinguish the points of superiority.

Form 1
The W. K. Kellogg National Corn Trophy

The trophy awarded to Mr. James was made by Tiffany, of New York, for Mr. W. K. Kellogg, at a cost of \$1,000. It is made of Sterling silver, bronze and enamel and is a truly artistic creation. It stands 30 inches in height. Mr. Kellogg's interest in corn growing can be understood when it is stated that the Kellogg Toasted Corn Flake Co., of which he is president, has an output requiring 10,000 bushels of corn a day, raw product, for its manufacture. A peculiar feature is that while the Kellogg product is made exclusively from selected white corn the Kellogg trophy has been won each time by a yellow corn exhibit. The trophy is offered for annual competition until won twice by the same grower.

The National Corn Show at which the award was made was an event of tremendous magnitude. At one of the sessions President Taft was present and delivered an address.
